SUMMARY

Results-oriented Software Developer with hands-on experience in PHP Laravel and ASP.NET development, specializing in building scalable web applications and RESTful Web APIs using MVC architecture. Proficient in MySQL and SQL Server for database design, query optimization, and backend integration, along with front-end technologies such as JavaScript and Bootstrap for responsive UI development. Worked on enterprise-level projects including HRMex Attendance Software and Society Management System in PHP Laravel, managing database structures, API development, and full application lifecycle. Strong team player with effective communication skills and the ability to collaborate efficiently in agile development environments to deliver high-quality solutions.

TECHNICAL SKILLS

Programming & Query Languages:	ASP.NET, PHP, JavaScript, Node.js, React, SQL, HTML/CSS
Integration & APIs:	REST APIs, Web API, Postman, JSON
Tools:	XAMPP, SSMS, Git, VisualSVN, Jira
Databases & Storage:	MySQL, MongoDB, SQL
Practices:	CI/CD, Integration Design, Debugging, Testing, Docker

PROFESSIONAL EXPERIENCE

Software Developer | CloudMex Technologies Jan 2025 – Present

- Contributing to the development and enhancement of **HRMex – HR & Payroll Management System**, delivering customized modules based on client requirements.
- Developed and maintained core modules including **Attendance & Payroll**, **ESS (Employee Self-Service)**, and **VMex (Visitor Management System)**.
- Designed and implemented **RESTful Web APIs**, integrated real-time features using **SignalR and AJAX**, and customized UI components to improve user experience and system responsiveness.
- Integrated third-party services such as **WhatsApp, Email, and SMS APIs**, enabling automated employee notifications and improving communication efficiency.
- Optimized complex **SQL queries, stored procedures, and large database operations**, improving system performance and reducing query execution time.
- Developed and generated **RDL reports**, ensuring accurate payroll and attendance reporting.
- Built a **Society Management System** from scratch using **PHP Laravel (MVC architecture)** with role-based authentication (Admin, Member, Security), routing, database design, and debugging.
- Designed and deployed two responsive corporate websites (HRMex & CloudMex Technologies) using **HTML, CSS, and JavaScript**.
- Actively involved in requirement analysis, database design, testing, debugging, and production support.
- Used **Postman** for testing and debugging REST APIs to ensure accurate data exchange and performance.

PROJECTS

Media Getter App (React.js) – Live | Repository

- Developed a dynamic media search application using **React.js and Redux** for centralized and scalable state management.
- Integrated third-party APIs including **Unsplash, Pexels, and Tenor** to fetch and display images, videos, and GIFs in real-time.
- Implemented advanced search functionality with keyword-based filtering and optimized API calls for improved performance.
- Designed and developed a **collection management feature**, allowing users to add, remove, and organize media items efficiently.
- Built functionality to dynamically add and delete media from collections with real-time UI updates.
- Ensured responsive and user-friendly interface using modern UI practices and clean component-based architecture.

Technologies: React.js, Redux, REST APIs, JavaScript, HTML5, TailwindCss

Modern Ochi Website Clone (React.js) – Live | Repository

- Developed a modern animated website using **React.js** with advanced UI/UX design principles.
- Implemented smooth scrolling and page transitions using **Framer Motion (motion.div)** and **GSAP with ScrollTrigger** for interactive animations.
- Designed responsive layouts using **Tailwind CSS** with additional custom CSS styling.
- Built reusable component-based architecture for scalability and maintainability.

Technologies: *React.js, Tailwind CSS, GSAP, ScrollTrigger, Framer Motion, JavaScript, CSS3*

Equilibrium Animated Landing Page – Live | Repository

- Developed a modern animated landing page with smooth scrolling and dynamic UI interactions to enhance user engagement.
- Implemented advanced front-end animations using **GSAP, ScrollTrigger, and Shery.js**, ensuring seamless visual transitions and interactive effects.
- Designed a fully responsive layout using **HTML, CSS, and JavaScript**, optimizing performance and cross-browser compatibility.

Technologies*: HTML5, CSS3, JavaScript, GSAP, ScrollTrigger, Shery.js*

Personal Portfolio – Live | Repository

React + TypeScript portfolio showcasing projects and live deployments with responsive UI.

EDUCATION

Chandigarh University| Chandigarh | Master of Computer Applications **Aug 2025 - Present**

Sant Gadge Baba University |Amravati | Bachelor of Computer Applications **Mar 2021 - Apr 2024**
